

Hunter Cable Assembly Ltd

a specialist manufacturer and distributor of
cable assemblies, wiring looms and harnesses, box builds and sub assemblies

JST Parts for Custom Cable Assemblies

19 May 2011

Find out more about the cable and connector manufacturer JST, what they specialise in, and where to find the products they sell for custom cable assemblies.

JST manufactures electronic components – they aim to produce them at speed, but also only components that show a high level of reliability and quality.

Their products are also designed to reduce the costs associated with building electronic applications, and improve efficiency.

They have a design and development team who test the products in laboratories – and can test the components which will be used in an application under similar environments to ensure they can handle the pressure required of them.

Automotive Custom Cable Assemblies

JST manufactures a wide range of automotive connectors for custom cable assemblies in automotive applications such as cars, trains, buses and aeroplanes.

They also provide matched tooling for every termination product, some of the connectors they produce include: Wire to Board Crimp Style Connectors, Wire to Wire Connectors, Squib Connectors, Waterproof Connectors, and High Frequency Connectors.

Interface Customer Cable Assemblies

Interface connectors are used for input and output connectivity and are usually used for the transmission of electronic data via copper or fibre optic.

JST offer a wide range that comply with many peripheral and network connector standards. Some of the products they manufacture include: AV Connectors, Combination Connectors, Mini Din Connectors, and USB Connectors.

Custom Cable Assembly Providers

Hunter Cable Assembly has 30 years experience of providing [custom cable assemblies](#) to its customers, in industries including automotive, industry, and medical applications.

They are able to supply specific electronic components for their customers' specific requirements, and use JST products in many of their assemblies.

Along with JST, they also combine products from other manufacturers such as Amphenol and HARTING, to provide the best solution.
